DETAILED ACTION

This Office action is in response to the amendment filed October 22, 2003 in which claim 1 was amended and claims 56-58 were added.

It is noted that Applicant has not provided the serial numbers of the copending application that are referred to on page 6 of the present application. Applicant is requested to provide that information in the response to the Office action.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 8, 10, 12, 30, 32, 44 and 45 are rejected under 35 USC 102(a) as being anticipated by Martin (US 6,238,554) for the reasons of record and the following comments.

Applicant argues that Martin does not specifically disclose, suggest or teach that the matrix material comprises the polymeric material of claims 8 and 30.

Applicant's matrix material is at least one polymeric material and is (1) substantially insoluble in the fuel and (2) effective to reduce the rate of release of the additive component into the fuel relative to an identical composition without the matrix material. Martin teaches that the polymeric material of his invention encases the fuel additive and is hydrocarbon insoluble in the fuel, yet is permeable to the fuel to allow the

fuel to penetrate the coating and contact the fuel additive. The examiner fails to see any difference between the claimed additive composition and that of Martin.

3. Claims 1, 4-7, 11, 13-17, 21-29, 33-36, 40-43 and 46-58 are allowable. The prior art fails to teach or suggest that the matrix is a polymeric material that includes repeating units from an unsubstituted aliphatic olefin monomer having 2-12 C atoms; that the matrix is a paste or gel; or that the matrix is an aliphatic acid component.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
